

Deploying Analytics to Drive System Adoption + Data Insights Across the Full-Platform

**Using Workday PRISM Analytics
Invisors Blended External Data
to Generate Cross-System Insights**

Business Leadership Analytics to Visualize Cross-System Data + Drill into Details

- Call Center Performance Analysis: Make more informed comp + talent decisions using job performance data
- External Supplier Invoice Detail: Track spend patterns + find opportunities to save on hidden line items
- Business Systems Data in Financial Reports: Automate data consolidation + analyze business results faster

Using Workday Data + Delivered Functionality Invisors Deployed These Analytics

** denotes Invisors Proprietary Dashboard*

The Workday business case for this multi-national financial services organization required access to real-time data analytics, use of Workday's full product capability, expectation to NOT just recreate current state, and an across-the-board upgrade to the end-user experience.

Invisors developed over 30 custom analytics across several different use-cases:

- Automated Cross-System Data Reporting in Workday for Business Leaders
- Customized "Start-Here" Dashboards to Organize Self-Service Capabilities
- Curated Dashboards for Process Owners to Monitor + Analyze Operations

Business End-User Dashboards to Organize Self-Service See + Do Capabilities

- System Health

IN OUR CUSTOMER'S
OWN WORDS

“ *Andi, this report is GANGSTER!!!! Way beyond what I expected, to be honest.
I love the red flags; I think this is an added element that I didn't ask for but didn't realize that I would need (more-so, want).* ”
